

## EDIsecure® VP 200 Visa Printer

### PREMIUM QUALITY FOR SECURE VISA AND TRAVEL DOCUMENT PRINTING

- Fully ICAO 9303 compliant personalization of visas
- Compact size for office use, therefore ideal for Embassies and Consulates
- Color inkjet flat-bed printer with single sheet feeder
- Prints on all types and formats of security paper
- High quality print results with brilliant colors and crisp, black text
- Sensor controlled flat-bed paper feeder with auto alignment and auto paper edge detection
- Supports all latest security requirements for visas such as digital color photographs, machine readable zones, and 2D-Barcodes
- Extra large ink tanks for economic and efficient operation

The EDIsecure® VP 200 Visa Printer is the perfect solution for high quality printing of all types and formats on security paper. It can print directly on every visa and registration form, without the need for special inkjet paper. The printer offers high flexibility for a large number of applications and is easy to operate in office environments at Embassies and Consulates due to the small footprint.

Each printed document will show lifelike colors, clean and bright, with clearly defined shades. Two print heads manage the job in parallel: a color print head with three colors for photographs with up to 4,800 dpi and a black print head for text and machine readable data with up to 1,200 dpi. Both utilize auto alignment and are equipped with integrated high capacity ink tanks. The print heads can be replaced separately for cost efficient, economic operation. Exclusively high security inks are used to guarantee light resistance and UV resistibility.

Due to the precise, multi-functional flatbed feeder, with automatic adjustment of documents and paper edge detection, all types and formats of security and standard paper material can be used, even coated paper, thin paper, or glossy photo paper. The position of the inserted document is measured before each print job.

The EDIsecure® VP 200 Visa Printer prints in black & white or in full color, on a wide range of paper sizes from biggest A4+ down to the smallest paper formats (55 x 70 mm). It integrates all necessary security features for high quality personalization. It supports digital photograph printing, security inks, machine-readable code lines, as well as 2D barcodes to encrypt data and biometric information (Iris, fingerprints).

THERE IS ONE FOR EVERYBODY

### FEATURES VP200

- Two print heads to manage the print job in parallel
- Color print head with up to 4,800 dpi and black print head for text and machine readable data with up to 1,200 dpi
- Prints on a wide range of paper types and formats (A4+ down to 55 x 70 mm)
- Prints on security and standard paper, even on thin paper, glossy photo paper, etc.
- USB 2.0 interface for flexible connectivity
- Sensor controlled flat bed paper feeder with automatic alignment and paper edge detection; the position of the inserted document is measured before each print job
- Extra large ink tanks for economic and efficient operation
- Intuitive, in-house developed printer driver for utmost user convenience and productivity
- High security inks with separate OCR ink

### SUPPLIES

- Color print head (300 nozzles) with attached 3-color ink tank (ink capacity 17 ml)
- Black print head (416 nozzles) with attached OCR ink tank (ink capacity 19 ml)

### OPTIONS

- Automatic sheet feeder for max. 250 pages
- Ethernet Adapter to connect the EDIsecure® VP 200 Visa Printer to an Ethernet network. The printer can be shared with other workgroup members

### CONFIGURE YOUR ID SYSTEM, ASK FOR:

- EDIsecure® Card Management Software Suite
- EDIsecure® Image Capture Modules
- EDIsecure® Image Enhancement Software
- EDIsecure® Signature Pad
- EDIsecure® Biometric Enrollment Devices
- IDExpert® ToolACT

### SPECIFICATIONS OF VP 200

Print Method	Color Inkjet
Print Speed	Up to 12 pages per minute
Print Resolution Mono-chrome	1,200 dpi
Print Resolution Color	4,800 x 1,200 dpi
